INDEX

ABSORPTION of cerebrospinal fluid, 40.

Acetylcholine, effect of, on blood flow, 695.

——, pilocarpine, atropine and, blood sugar after, 551.

Activity, voluntary, after destruction of adrenal medulla, 657.

ADAMS, M., W. M. BOOTHBY and A. M. SNELL. Metabolic studies in osteoporosis, 383.

Adrenal cortex and carbohydrate formation, 297.

—— medulla, voluntary activity after destruction of, 657.

—— ——, work capacity after destruction of, 653.

Adrenalin. *See Epinephrine.*

—— activity and potassium of tissues, 207.

Afferent function in C fibers, 69.

Age and tissue respiration, 255.

Air movement as stimulus to skin, 269.

Anemia caused by blacktongue-producing diet, 25.

Anemic, anti-, treatment in polycythemia, 194.

Asphyxial poisoning, methylene blue and, 160.

Atropine and acetyl choline, pilocarpine and, blood sugar after, 551.

Axon excitation in nerve, 309, 317, 328.

BAGNO, S. See BARNETT and BAGNO, 366.

BARNES, R. H. and E. M. MACKAY. The maltase activity of the blood serum of various species, 534.

BARNETT, A. and S. BAGNO. The physiological mechanisms involved in the clinical measure of phase angle, 366.

BARON, H. and R. CHAMBERS. A micromanipulative study on the migration of blood cells in frog capillaries, 700.

BARRIS, R. W. and W. R. INGRAM. The effect of experimental hypothalamic lesions upon blood sugar, 555.

——. See INGRAM and BARRIS, 562.

BEHNKE, A. R., H. S. FORBES and E. P. MOTLEY. Circulatory and visual effects of oxygen at 3 atmospheres pressure, 436.

——, L. A. SHAW, A. C. MESSER, R. M. THOMSON and E. P. MOTLEY. The circulatory and respiratory disturbances of acute compressed-air illness and the administration of oxygen as a therapeutic measure, 526.

——, R. M. THOMSON and L. A. SHAW. The rate of elimination of dissolved nitrogen in man in relation to the fat and water content of the body, 137.

BERKSON, J. See NYGAARD, WILDER and BERKSON, 128.

BISCHOFF, F. The influence of divided dosage of gonadotropic extracts in the immature male rat, 483.

BISHOP, G. H. and P. HEINBECKER. The afferent functions of nonmyelinated or "C" fibers, 179.

——. See HEINBECKER and BISHOP, 212.

Black-tongue, vitamin G as preventive of, 429.

BLAIR, E. A. and J. ERLANGER. On excitation and depression in axons at the cathode of the constant current, 317.

—— —— ——. On the process of excitation by brief shocks in axons, 309.

——. See ERLANGER and BLAIR, 328.

BLAIR, H. A. On the use of Lapicque's factor for converting voltage-capacity to strength-duration curves, 620.

BLAIR, H A. The time-intensity curve and latent addition in the mechanical stimulation of nerve, 586.
Blood. *See Circulation.*
—— cells, migration of, in frog capillaries, 700.
——, circulation of, as related to cutaneous stimulation, 269.
—— clots, platelets and physical properties of, 709.
—— clotting, 667.
—— corpuscles, permeability of, to glucose, 488.
—— counts, daily, in menstrual cycle, 452.
——, erythrocyte volume of, viscosity and, 128.
—— flow, arterial and venous plasma sugar and, effect of epinephrine on, 53.
—— ——, coronary, in hypertension, 609.
—— ——, effect of acetylcholine on, 695.
—— ——, reduced coronary, ventricular alternation from, 407.
——, hematopoietic action of cobalt, 414.
——, intramuscular pressure and venous return of, 261.
—— lipids during pregnancy in guinea pigs, 635.
—— pressure and cardiac output, carbon arc radiation and, 594.
—— —— —— —— responses of pre-adolescent boys to exercise, 473.
—— ——, venous, and intramuscular pressure, 261.
—— protein regeneration after bleeding, 204.
—— serum, maltase activity of, 534.
—— sugar and blood flow, effect of epinephrine on, 53.
—— ——, experimental hypothalamic lesions and, 555.
—— —— following autonomic drugs, 551.
—— values in dogs, rabbits and rats, 502.
—— vessels, cerebral, response of, to sympathetic stimulation, 278.
Body fluids, perivascular seep valves in exchange of, 491.
—— structure and weight, effect of gonadectomy on, 515.
BOOHER, L. E. and G. H. HANSMANN. Vitamin G concentrates as preventives against blacktongue, 429.
BOOTHBY, W. M. See ADAMS, BOOTHBY and SNELL, 383.
BOYD, E. M. and M.-D. FELLOWS. Blood lipids during pregnancy in guinea pigs, 635.
BOYD, T. E. See HUMMON and BOYD, 85.
Brain, action potentials after lesions, 692.
—— cortex, intrinsic circulatory regulation in, 572.
—— lesions, heat production in relation to, 661.
BRINKHOUS, K. M. See WARNER, BRINKHOUS and SMITH, 667.
BRONK, D. W. See GAMMON and BRONK, 77.
BROOKS, C. M. The reaction of chronic spinal animals to hemorrhage, 30.
BROOKS, M. M. Methylene blue and hemoglobin derivatives in asphyxial poisoning, 160.
BUNTING, H., W. J. MEEK and C. A. MAASKE. The chemical transmission of vagal effects to the small intestine, 100.

CAPILLARIES, frog, migration of blood cells in, 700.
Carbohydrate formation, adrenal cortex and, 297.
—— metabolism, hypothalamic lesions and, 562.
—— —— of diabetic heart, 273.
Cardiac. *See Heart.*
—— blood flow and ventricular alternation, 407.
—— output, blood pressure and, effect of carbon arc radiation on, 594.
Cardio-vascular responses of pre-adolescent boys to exercise, 473.
Cerebral action potentials after brain lesions, 692.
Cerebrospinal fluid, absorption of, 40.

CHAIKOFF, I. L., G. F. HOLTOM and F. L. REICHERT. The glycogen content of liver and muscle in the completely hypophysectomized dog, 468.
CHAMBERS, R. See BARON and CHAMBERS, 700.
Chloride absorption by intestinal epithelium, 676, 681
Circulation. *See Blood.*
—— and respiration in acute compressed-air illness, 526.
Circulatory and visual effects of oxygen at 3 atmospheres pressure, 436.
—— regulation, intrinsic, in parietal cortex, 572.
CLARK, D., J. HUGHES and H. S. GASSER. Afferent function in the group of nerve fibers of slowest conduction velocity, 69.
CO, effect of, on recovery of muscle, 625.
Coagulation, effect of foreign tissue extracts on, 1.
—— laminar thermo-, effects of, on action potentials of cerebral cortex, 692.
—— of dog heparin plasma, foreign sera and, 19.
Cobalt, hematopoietic action of, 414.
Compressed-air illness, acute, 526.
Contraction, electrical activity of muscle during, 90.
CORI, C. F., R. E. FISHER and G. T. CORI. The effect of epinephrine on arterial and venous plasma sugar and blood flow in dogs and cats, 53.
CORI, G. T. See CORI, FISHER and CORI, 53.
Corneo-retinal potential in recording eye movements, 423.
Coronary flow in hypertension, 609.
Cortex, parietal, intrinsic circulatory regulation in, 572.
CRAMPTON, C. B. See SCHNEIDER and CRAMPTON, 473.
Creatinine excretion by dog, inulin and, 362.
——, intravenously injected, elimination of, 240.
CRIDER, J. O. See THOMAS and CRIDER, 603.
CROHN, N. See SOSKIN, MIRSKY, ZIMMERMAN and CROHN, 110.
CUTTER, R. D. See CUTTING and CUTTER, 204.
CUTTING, W. C. and R. D. CUTTER. Plasma protein regeneration after bleeding in the rat, 204.

DAVIS, J. E. and A. B. HASTINGS. The effect of thyroxin on the tissue metabolism of excised Limulus heart, 618.
Dextrose tolerance curves in absence of insulin, 648.
Diabetes, hunger, and use of glucose in fasting dog, 106.
——, pancreatic, and cardiac metabolism, 273.
Diabetic dogs, synthesis of fat by intestine of, 132.
Diet, blacktongue-producing, anemia caused by, 25.
DOMINGUEZ, R., H. GOLDBLATT and E. POMERENE. Kinetics of the elimination of substances injected intravenously (experiments with creatinine), 240.
DOTTI, L. B. The response of the rabbit to insulin, 538.
DOWLING, A. S. See SPIES and DOWLING, 25.
DU BUY, H. G. The electrical phenomena of the crustacean nerve-muscle system, 224.
Duodenal contents, effect of fat on pH of, 603.
DUSSER DE BARENNE, J. G. and W. S. MCCULLOCH. Some effects of laminar thermocoagulation upon the local action potentials of the cerebral cortex of the monkey, 692.
DYE, J. A. On the question of duplication of sympathetic innervation to bilaterally innervated structures, 443.

ENDOCRINE rôle of placenta, 399.
Energy expenditure in relation to food, 235.
Epinephrine. *See Adrenalin.*
——, effect of, on arterial and venous plasma sugar and blood flow, 53.

Erlanger, J. and E. A. Blair. Observations on repetitive responses in axons, 328.
——. See Blair and Erlanger, 309, 317.
Erythrocyte values in dogs, rabbits and rats, 502.
—— volume of blood, viscosity and, 128.
Erythrocytes, permeability of, to glucose, 488.
Evans, G. The adrenal cortex and endogenous carbohydrate formation, 297.
Exercise, cardio-vascular responses of pre-adolescent boys to, 473.
Eye movements, corneo-retinal potential in recording, 423.
Eyster, J. A. E. See Krasno, Eyster and Maaske, 119.

Fat, effect of, on pH of duodenal contents, 603.
——, synthesis of, by intestine of diabetic dogs, 132.
Fazikas, J. F. See Himwich, Goldfarb and Fazikas, 273.
Fellows, M.-D. See Boyd and Fellows, 635.

THE AMERICAN JOURNAL OF PHYSIOLOGY

VOLUME 114

BALTIMORE, MD.
1935–1936

CONTENTS

No. 1. December, 1935

The Specific Nature of the Inhibition of the Coagulating Effect Exerted by Tissue Extract on Plasma Resulting from Incubation of Tissue Extract with Blood Serum. *C. Moore, V. Suntzeff and Leo Loeb* 1

On the Inhibiting Action of Cattle and Sheep Serum on Kidney Extracts of Cattle and Sheep. *Eric W. Thurston, J. E. Smadel and Leo Loeb* 19

The Experimental Production of Anemia in Dogs by Means of a Blacktongue-Producing Diet. *Tom D. Spies and Alexander S. Dowling* 25

The Reaction of Chronic Spinal Animals to Hemorrhage. *Chandler M. Brooks* 30

Forces Concerned in the Absorption of the Cerebrospinal Fluid. *Lewis H. Weed* 40

The Secretory Metabolism of the Salivary Glands. *David Northup* 46

The Effect of Epinephrine on Arterial and Venous Plasma Sugar and Blood Flow in Dogs and Cats. *C. F. Cori, R. E. Fisher and G. T. Cori* 53

Afferent Function in the Group of Nerve Fibers of Slowest Conduction Velocity. *Dean Clark, Joseph Hughes and Herbert S. Gasser* 69

The Discharge of Impulses from Pacinian Corpuscles in the Mesentery and Its Relation to Vascular Changes. *G. D. Gammon and D. W. Bronk* 77

Changes in Electrical Resistance of Nerve During Block by Cold and by Heat. *Irvin F. Hummon, Jr. and T. E. Boyd* 85

Electrical Activity of Human Motor Units During Voluntary Contraction. *Donald B. Lindsley* 90

The Chemical Transmission of Vagal Effects to the Small Intestine. *Henry Bunting, Walter J. Meek and C. A. Maaske* 100

"Hunger Diabetes" and the Utilization of Glucose in the Fasting Dog. *Samuel Soskin and I. Arthur Mirsky* 106

Influence of Hypophysectomy on Gluconeogenesis in the Normal and Depancreatized Dog. *Samuel Soskin, I. Arthur Mirsky, Leo M. Zimmerman and Nathan Crohn* 110

The Nature of the T Wave Potentials in the Tortoise Heart. *M. R. Krasno, J. A. E. Eyster and C. A. Maaske* 119

The Relation Between Viscosity of the Blood and the Relative Volume of Erythrocytes (Hematocrit Value). *Kaare K. Nygaard, Marion Wilder and Joseph Berkson* 128

The Synthesis of Neutral Fat by the Intestine of Diabetic Dogs. *Smith Freeman and A. C. Ivy* 132

The Rate of Elimination of Dissolved Nitrogen in Man in Relation to the Fat and Water Content of the Body. *Albert R. Behnke, Robert M. Thomson and Louis A. Shaw* 137

A Further Study of the Electric Responses of Smooth Muscle. *E. F. Lambert and A. Rosenblueth* 147

Methylene Blue and Hemoglobin Derivatives in Asphyxial Poisoning. *Matilda Moldenhauer Brooks* 160

The Afferent Functions of Non-Myelinated or "C" Fibers. *Geo. H. Bishop and Peter Heinbecker* 179

Antianemic Treatment in Experimental Polycythemia. *Louise Hanson Marshall.* 194
Plasma Protein Regeneration After Bleeding in the Rat. *Windsor C. Cutting and Richard D. Cutter.* 204
Changes in the Circulatory Effect of Potassium Salts Due to Epinephrine (Adrenalin). *H. A. McGuigan and J. A. Higgins.* 207
Studies on the Extrinsic and Intrinsic Nerve Mechanisms of the Heart. *Peter Heinbecker and George H. Bishop.* 212
The Electrical Phenomena of the Crustacean Nerve-Muscle System. *H. G. du Buy.* 224
Effects of Ingestion of Nutritive and Non-Nutritive Liquids upon Diurnal Variations in Weight Loss. *Carl Iver Hovland.* 235
Kinetics of the Elimination of Substances Injected Intravenously (Experiments with Creatinine). *Rafael Dominguez, Harry Goldblatt and Elizabeth Pomerene.* 240

No. 2. JANUARY, 1936

Age and Tissue Respiration. *John M. Pearce.* 255
Muscle Tonus, Intramuscular Pressure and the Venopressor Mechanism. *Yandell Henderson, A. W. Oughterson, L. A. Greenberg and C. P. Searle.* 261
Air Movement as a Stimulus to the Skin, the Reflex Effects Upon Muscle Tonus, and Indirectly Upon the Circulation of the Blood; Also the Effects of Therapeutic Baths. *Yandell Henderson, A. W. Oughterson, L. A. Greenberg and C. P. Searle.* 269
The Carbohydrate Metabolism of the Heart During Pancreas Diabetes. *H. E. Himwich, W. Goldfarb and J. F. Fazikas.* 273
Constriction of Pial Vessels in the Unanesthetized Cat Produced by Stimulation of the Cervical Sympathetic Chain. *Caroline Bedell Thomas.* 278
On Various Properties of Thromboplastin (Aqueous Tissue Extracts). *Armand J. Quick.* 282
The Adrenal Cortex and Endogenous Carbohydrate Formation. *Gerald Evans.* 297
On the Process of Excitation by Brief Shocks in Axons. *E. A. Blair and Joseph Erlanger.* 309
On Excitation and Depression in Axons at the Cathode of the Constant Current. *E. A. Blair and Joseph Erlanger.* 317
Observations on Repetitive Responses in Axons. *Joseph Erlanger and E. A. Blair.* 328
The Excretion of Inulin and Creatinine at Low Urine Flows by the Normal Dog. *James A. Shannon.* 362
The Physiological Mechanisms Involved in the Clinical Measure of Phase Angle. Circuits Simulating the Phase Angle Properties of the Body; Correlations with Experimental Findings in Normal and Pathological States. *Avrom Barnett and Samuel Bagno.* 366
Metabolic Studies in Osteoporosis. *Mildred Adams, Walter M. Boothby and Albert M. Snell.* 383
Reduction of Litter Size and Maintenance of Pregnancy in the Oophorectomized Rat: Evidence Concerning the Endocrine Rôle of the Placenta. *Hans O. Haterius.* 399
The Nature of Ventricular Alternation Resulting from Reduced Coronary Blood Flow. *Harold D. Green.* 407
On the Mechanism of the Hematopoietic Action of Cobalt. *James M. Orten.* 414
The Corneo-Retinal Potential Difference as the Basis of the Galvanometric Method of Recording Eye Movements. *O. H. Mowrer, T. C. Ruch and N. E. Miller.* 423

Vitamin G Concentrates as Preventives Against Black-Tongue. With Parallel Studies of the Same Concentrates in the Diets of White Rats. *L. E. Booher and G. H. Hansmann* 429
Circulatory and Visual Effects of Oxygen at 3 Atmospheres Pressure. *Albert R. Behnke, Henry S. Forbes and E. Preble Motley* 436
On the Question of Duplication of Sympathetic Innervation to Bilaterally Innervated Structures. *J. A. Dye* 443
Daily Erythrocyte Counts in Menstrual and Intermenstrual Periods. *Christianna Smith* 452
Evidence of the Non-Segmental Character of Spinal Reflexes from an Analysis of the Cephalad Effects of Spinal Transection (Schiff-Sherrington Phenomenon). *T. C. Ruch* 457
The Glycogen Content of Liver and Muscle in the Completely Hypophysectomized Dog. *I. L. Chaikoff, G. F. Holtom and F. L. Reichert* 468
The Cardio-Vascular Responses of Pre-Adolescent Boys to Muscular Activity. *Edward C. Schneider and C. B. Crampton* 473
The Influence of Divided Dosage of Gonadotropic Extracts in the Immature Male Rat. *Fritz Bischoff* 483
Changes in the Permeability of Red Corpuscles in Shed Blood to Glucose. *J. M. D. Olmsted* 488
Perivascular Seep Valves in the Exchange of Body Fluids. *P. F. Swindle* 491
Values for Number, Size and Hemoglobin Content of Erythrocytes in Normal Dogs, Rabbits and Rats. *M. M. Wintrobe, H. B. Shumacker, Jr. and W. J. Schmidt* 502
Effect of Oestrin on the Activity of the Anterior Lobe of the Pituitary. *H. L. Fevold, F. L. Hisaw and R. Greep* 508

No. 3. February, 1936

The Effect of Gonadectomy on Body Structure and Body Weight in Albino Rats. *Helen Holt, Robert W. Keeton and Birgit Vennesland* 515
The Circulatory and Respiratory Disturbances of Acute Compressed-Air Illness and the Administration of Oxygen as a Therapeutic Measure. *Albert R. Behnke, Louis A. Shaw, Anne C. Messer, Robert M. Thomson and E. Preble Motley* 526
The Maltase Activity of the Blood Serum of Various Species. *Richard H. Barnes and Eaton M. MacKay* 534
The Response of the Rabbit to Insulin. *Louis B. Dotti* 538
The Blood Sugar Level After Administration of Pilocarpine, Atropine and Acetyl Choline. *M. Caroline Hrubetz* 551
The Effect of Experimental Hypothalamic Lesions upon Blood Sugar. *R. W. Barris and W. R. Ingram* 555
Evidence of Altered Carbohydrate Metabolism in Cats with Hypothalamic Lesions. *W. R. Ingram and R. W. Barris* 562
The Intrinsic Regulation of the Circulation in the Parietal Cortex of the Cat. *Carl F. Schmidt with the technical assistance of Samuel Thompson* 572
The Time-Intensity Curve and Latent Addition in the Mechanical Stimulation of Nerve. *H. A. Blair* 586
The Effect of Carbon Arc Radiation on Blood Pressure and Cardiac Output. *J. Raymond Johnson, B. E. Pollock, H. S. Mayerson and Henry Laurens* 594
The Effect of Fat on the pH of the Contents of the Duodenum. *J. Earl Thomas and J. O. Crider* 603
The Phasic and Minute Coronary Flow During Acute Experimental Hypertension. *Donald E. Gregg* 609

The Effect of Thyroxin on the Tissue Metabolism of Excised Limulus Heart. *J. E. Davis and A. Baird Hastings* 618
On the Use of Lapicque's Factor for Converting Voltage-Capacity to Strength-Duration Curves. *H. A. Blair* 620
The Effect of CO on Recovery of Frog Skeletal Muscle. *John B. Hursh* 625
Blood Lipids During Pregnancy in Guinea Pigs. *Eldon M. Boyd and Marvel-Dare Fellows* 635
Measurement of the Superficial Temperature Gradient in Man. *Emanuel S. Mendelson* 642
Normal Dextrose Tolerance Curves, in the Absence of Insulin, in Hypophysectomized-Depancreatized Dogs. *S. Soskin, I. A. Mirsky, L. M. Zimmerman and R. C. Heller* 648
Work Capacity in the Rat After Destruction of the Adrenal Medulla. *D. J. Ingle, W. M. Hales and G. M. Haslerud* 653
Voluntary Activity of the Rat After Destruction of the Adrenal Medulla. *Dwight J. Ingle and Robert E. Harris* 657
Changes in Heat Production After Removal of Motor and Premotor Areas in Monkeys. *Nathan Rakieten* 661
A Quantitative Study on Blood Clotting: Prothrombin Fluctuations under Experimental Conditions. *E. D. Warner, K. M. Brinkhous and H. P. Smith* 667
The Production of Chloride-Free Solutions by the Action of the Intestinal Epithelium. *Raymond C. Ingraham and Maurice B. Visscher* 676
The Influence of Various Poisons on the Movement of Chloride Against Concentration Gradients from Intestine to Plasma. *Raymond C. Ingraham and Maurice B. Visscher* 681
Observations on the Path Taken by the Pain Fibers from the Heart. *Walter Mayne and Louis N. Katz* 688
Some Effects of Laminar Thermocoagulation upon the Local Action Potentials of the Cerebral Cortex of the Monkey. *J. G. Dusser de Barenne and Warren S. McCulloch* 692
Effect of Acetylcholine on the Bloodflow through the Stomach and Legs of the Rat. *H. Necheles, R. Frank, W. Kaye and E. Rosenman* 695
A Micromanipulative Study on the Migration of Blood Cells in Frog Capillaries. *Harry Baron and Robert Chambers* 700
Platelets and the Structure and Physical Properties of Blood Clots. *Leandro M. Tocantins* 709
Index 717
